

Overview

CattleLog Express is a software program that is used to collect basic age, source, and movement data on cattle. Available as a free download, CattleLog Express program provides a series of simplified collection screens and functions to make data collection easier for limited data sets.

Benefits

CattleLog Express provides numerous benefits, including the following:

- Allows producers to focus on collection of a small number of key data fields such as age, source, and animal movements
- Prominently displays movement, source, and age information data fields on the main screen
- Collecting cattle data is very fast, the software will not slow processing
- Allows customization of local reports for real-time use
- Data upload process is secure and fast
- Allows user to tap into full supply chain reporting offered by CattleLog Reports

The screenshot shows the CattleLog Express software interface. It includes a menu bar (File, Tools, Help) and a toolbar (Names, Reports, Upload, Reader, Clear, Help). The main window is divided into several sections:

- Current Custody:** *Name: MBT, *Location: North Quarter, Premises ID: 00-112233.
- Shipping Information:** Received From: Ranch A, Location: South Section, Date: 06-11-2007, Shipped To: 06-13-2007, Tracking #: 12345.
- Animal:** *EID: 98200000970100, Lot: Angus, Pen: North Quarter, Gender: HEIFER, *Country: USA. Includes checkboxes for Affidavit on File, Verified Origin, Home-Raised, and Purchased.
- Scans:** A table with columns: Count, EID, VID Prefix, VID Value, Lot, Pen, Back Ta..., Back Ta..., Gender, E. The table contains 5 rows of scan data.

Count	EID	VID Prefix	VID Value	Lot	Pen	Back Ta...	Back Ta...	Gender	E
5	982000000970100	MBT	22	Angus	North Qu...			HEIFER	
4	982000000966952	MBT	89	Angus	North Qu...			STEER	
3	982000041216310	MBT	104	Angus	North Qu...			STEER	
2	982000000966991	MBT	66	Angus	North Qu...			HEIFER
